

Close to your **water** data

We work **together** !

### Hardware

A real field laboratory.  
Measure and analyze your samples directly at your workplace

### Software

Use a complete software that allows you to do all the work of a laboratory in real time.

### Expert

Our water chemistry specialists understand your issues related to water quality.

The **Process** ?

### Diagnostic

We analyze the needs and define together the useful tools.

### Support

We assess the analytical need and stay with you

### Monitoring

We anticipate the data of your water over a future period of time.

## What is Extralab ?

The all-in-one partner for the analysis and prevention of industrial risks related to water quality

-  **In situ**
-  **In real time**
-  **Laboratory**
-  **Platform**
-  **Water**
-  **Remotely**

On any **surface...**
